EDUCATION

San Francisco State University

Aug 11, 2014 - Dec 20, 2018

Bachelor - Computer Science

SKILLS

MEAN Stack Developer: Node.js, Typescript, Angular, MongoDB, Bootstrap

EXPERIENCE

| Associate Technical Lead

Mar 1, 2022 - Present

<https://www.deliverysolutions.co/>

Delivery Solutions enables enterprise grade Home Delivery for Retail.

- Continued leading and growing a team of engineers within the product team
- Led the rewrite of a core feature - stores' service coverage mapping where clients can create and draw various boundaries to determine both availability and methodology of fulfillment. The rewrite resulted in improved performance (5x-6x) and usability thanks to a reimagined user interface.

| Senior Software Engineer

Aug 1, 2020 - Mar 1, 2022

- Led a team focusing on product development, managing and mentoring software engineers
- Led the development of features for the product
- Involved in the hiring of senior software engineers for the product team
- Integrated multiple delivery providers into the Delivery Solutions platform's various microservices
- Designed & developed an Angular 8 based responsive website that served as a live tracking page for end customers
- Built a domain whitelabeling feature for the above mentioned live tracking page
- Worked & communicated directly with USA based clients in order to provide solutions and gather requirements
- Part of incident response team, handling all incidents that impacted deliveries to customers and client operations
- Developed & maintained a variety of scripts that directly interacted with the production database, AWS API Gateway & Cloudwatch Logs, for the purpose of recovering from incidents

| Software Engineer, Delivery Solutions Team

Jul 17, 2019 - Jul 31, 2020

<https://www.tacto.in/>

Part of a dedicated team within Tacto focused on servicing Delivery Solutions

- Spearheaded the migration of the frontend from Angular 4 to Angular 8
- Handled the revamp of the frontend, utilising Dashkit (Bootstrap 4) to replace Inspinia theme
- Refactored the Angular website in order to break up the single root module with all components & services into isolated modules
- Implemented lazy loading, Angular PWA, service worker, which resulted in much faster render times, as well as the ability to check and fetch the latest version of the website
- Got promoted quickly from Junior Software Engineer to Software Engineer to Senior Software Engineer within a year's time
