TECHNICAL SKILLS

MEAN Stack Developer

Node.js, Typescript, Angular, MongoDB, Bootstrap

EDUCATION

Bachelor in Computer Science at San Francisco State University

Aug 2014 - Dec 2018

EMPLOYMENT

Delivery Solutions — Associate Technical Lead
Mar 2022 - Present

Delivery Solutions enables enterprise grade Home Delivery for Retail.

- Continued leading and growing a team of engineers within the product team
- Led the rewrite of a core feature - stores' service coverage mapping where clients can create and draw various boundaries to determine both availaiblity and methodology of fulfillment. The rewrite resulted in improved performance (5x-6x) and usability thanks to a reimagined user interface.

Delivery Solutions — Senior Software Engineer
Aug 2020 - Mar 2022

- Led a team focusing on product development, managing and mentoring software engineers
- Led the development of features for the product
- Involved in the hiring of senior software engineers for the product team
- Integrated multiple delivery providers into the Delivery Solutions platform's various microservices
- Designed & developed an Angular 8 based responsive website that served as a live tracking page for end customers
- Built a domain whitelabeling feature for the above mentioned live tracking page
- Worked & communicated directly with USA based clients in order to provide solutions and gather requirements
- Part of incident response team, handling all incidents that impacted deliveries to customers and client operations
- Developed & maintained a variety of scripts that directly interacted with the production database, AWS API Gateway & Cloudwatch Logs, for the purpose of recovering from incidents

Tacto — Software Engineer, Delivery Solutions Team
Jul 2019 - Jul 2020

Part of a dedicated team within Tacto focused on servicing Delivery Solutions

- Spearheaded the migration of the frontend from Angular 4 to Angular 8
- Handled the revamp of the frontend, utilising Dashkit (Bootstrap 4) to replace Inspinia theme
- Refactored the Angular website in order to break up the single root module with all components & services into isolated modules
- Implemented lazy loading, Angular PWA, service worker, which resulted in much faster render times, as well as the ability to check and fetch the latest version of the website
- Got promoted quickly from Junior Software Engineer to Software Engineer to Senior Software Engineer within a year's time
