Work

2020-08-01 - Present
Delivery Solutions
Senior Software Engineer

Delivery Solutions enables enterprise grade Home Delivery for Retail.

> Integrated multiple delivery providers into the Delivery Solutions platform's various microservices

> Designed & developed an Angular 8 based responsive website that served as a live tracking page for end customers

> Built a domain whitelabeling feature for the above mentioned live tracking page

> Worked & communicated directly with USA based clients in order to provide solutions and gather requirements

> Part of incident response team, handling all incidents that impacted deliveries to customers and client operations

> Developed & maintained a variety of scripts that directly interacted with the production database, AWS API Gateway & Cloudwatch Logs, for the purpose of recovering from incidents

2019-07-17 - 2020-07-31
Tacto
Software Engineer, Delivery Solutions Team

Part of a dedicated team within Tacto focused on servicing Delivery Solutions

> Spearheaded the migration of the frontend from Angular 4 to Angular 8

> Handled the revamp of the frontend, utilising Dashkit (Bootstrap 4) to replace Inspinia theme

> Refactored the Angular website in order to break up the single root module with all components & services into isolated modules

> Implemented lazy loading, Angular PWA, service worker, which resulted in much faster render times, as well as the ability to check and fetch the latest version of the website

> Got promoted from Junior Software Engineer to Software Engineer in 6 months (January 2020), and again from Software Engineer to Senior Software Engineer in 6 months (June 2020)
